# General information

## Pre-ride check-list

- I will also find out about the regulations governing child transport in my country.
- I will carefully check the load and riding behaviour of my bike before every ride.
- I will always lift the children into the child seat or onto the seat. The bike can topple over if they climb onto it independently.
- When carrying two children – with or without a child seat – the heavier child will always sit directly behind the saddle.

## Warning

- The seat cushion and backrest always need to be correctly fitted when using the Safety bar without an additional child seat.
- When transporting children without a child seat, they should have a good understanding of the risks of riding as a passenger and should not make any jerky movements.
- Installing two child seats could restrict access to the bike lock and pedal area.

## Information

- All details relating to the Multicharger refer equally to the Multicharger Mixte with lowered top tube.
- HS stands for High Speed. These e-bikes offer greater motor assistance and, depending on national regulations, require a driving licence, car insurance and the wearing of a helmet.

## Age ratings

Age	Accessory	Approval
1-7 years	Safety bar	1-2 children with child seat
8-9 years	Safety bar	1-2 children (with the exception of HS bikes)
from 8 years	Passenger kit	1 child
